

Clinical Trial Protocol

Iranian Registry of Clinical Trials

19 Jul 2026

Comparison of the effect of Throwers Ten Exercises and Modified Stretching Movements on fatigue intensity in patients with type 2 diabetes

Protocol summary

Study aim

Determining Comparison of the effect of Throwers Ten Exercises and Modified Stretching Movements on fatigue intensity in patients with type 2 diabetes

Design

Clinical trial with control group, with parallel, randomized groups, 75 patients

Settings and conduct

Approval of the research plan in the ethics committee of the university vice chancellor for research. First, complete the demographic checklist and the Smets's Multidimensional Fatigue Inventory. The number of training sessions in the two groups of Throwers Ten Exercises and Modified Stretching Movements is 3 times a week for a month and each session is 30 to 45 minutes at 10 and 11 o'clock in the morning. Immediately after the sessions, the patients' fatigue severity will be re-evaluated using a Smets's Multidimensional Fatigue Inventory. The exercises will be performed at the patients' homes using a CD and a pamphlet prepared by the researcher.

Participants/Inclusion and exclusion criteria

Admission requirements: 1- Ability to communicate and answer questions 2- At least 6 months have passed since the diagnosis of type 2 diabetes by an endocrinologist. Conditions of non-entry: 1- Performing amputation in the arms and legs 2- Previous participation in studies similar to the current research

Intervention groups

Intervention group 1: Throwers Ten Exercises: These exercises are 3 times a week for a month and each session is 30 to 45 minutes at 10 and 11 in the morning. Intervention group 2: Modified Stretching Movements: These exercises are 3 times a week for a month and each session is 30 to 45 minutes at 10 and 11 in the morning. Control group: Non-intervention: This training group will not be given.

Main outcome variables

Fatigue

Scientific title
Comparison of the effect of Throwers Ten Exercises and Modified Stretching Movements on fatigue intensity in patients with type 2 diabetes

Public title
Comparison of the effect of Throwers Ten Exercises and Modified Stretching Movements on fatigue intensity in patients with type 2 diabetes

Purpose
Supportive

Inclusion/Exclusion criteria
Inclusion criteria:
 Ability to communicate and answer questions Consent to participate in the study and sign the informed consent form Age 30 to 60 years At least 6 months have passed since the diagnosis of type 2 diabetes by an endocrinologist
Exclusion criteria:
 Perform amputations on the arms and legs Neurological illnesses such as (depression and schizophrenia) and taking psychiatric medications Previous participation in studies similar to current research Cervical disc, lumbar disc and orthopedic problems Class 3 and 4 heart failure

Age
From **30 years** old to **60 years** old

Gender
Both

Phase
N/A

Groups that have been masked
No information

Sample size
Target sample size: **75**

Randomization (investigator's opinion)
Randomized

Randomization description
Random block properties will be assigned using the List Randomization site and the creation of different number of blocks between the three groups of intervention 1 (Throwers Ten Exercises), intervention 2 (Modified Stretching Movements) and control. Using the site (<https://www.sealedenvelope.com/simple-randomiser/v1/lists>) random blocks of different sizes and multiplied by 3 (9, 6, 3) will be created.

Blinding (investigator's opinion)
Not blinded

Diabetes mellitus

Primary outcomes

1

Description

Fatigue

Timepoint

Patients' fatigue at the beginning of the study (before the intervention) and immediately after the start of the study

Method of measurement

Smets's Multidimensional Fatigue Inventory

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group1: Throwers Ten Exercises: Exercises in this group include 10 exercises in the upper limbs, including hands - elbows - shoulders - wrists and arms in different directions, which will be in accordance with the principle of overload (holding time and number of hands) that these exercises include ; Diagonal pattern in the form of hand opening, external rotation around the waist,

external rotation at shoulder level, shoulder distance from shoulder surface, raising the scapula (scissors), Sidelying, lying on the abdomen in a horizontal position and limbs from Body rotation, pressing presses, UPS pressure, Bicep Curl, wrist extension or opening, wrist, lying down open, diagonal pattern with hand bending, internal rotation around waist, internal rotation on surface Shoulders, lying on the abdomen in a horizontal position and keeping the hands away from the body 100 degrees, Elbow Extension, diagonal pattern opening and bending the hands, diagonal pattern bending and opening the arms, internal and external rotation Around the waist, internal and external rotation at shoulder level, in the abdomen, opening and bending the elbow, bending the wrist, wrist open downwards (opposite to the previous position) and external rotation to the abdomen. These exercises are 3 times a week for a month and each session is 30 to 45 minutes at 10 and 11 o'clock in the morning.

Category

Rehabilitation

2

Description

Intervention group 2: Modified Stretching Movements: These movements should be gentle and regular, including; Triceps, sliding against the wall, spine rotation, squatting, elbows close to the knees while moving, lifting while walking, twisting one leg, stretching the thighs while standing, stretching the muscles behind the thighs with the help of Sitting posture, Twin leg stretching, Diagonal stretching of the thigh in standing position, Stretching of the back thigh muscles with the help of standing posture, Horseshoe stretching in the standing position, Stretching of the thigh in the supine position, Cross stretching of the back thigh muscles with the help of cross, Stretching Standing twin and horseshoe muscles, bending the pelvis while kneeling, stretching the muscles behind the thighs while lying down with a towel, and stretching the twin and standing horseshoe muscles. These exercises are 3 times a week for a month and each session is 30 to 45 minutes at 10 and 11 o'clock in the morning.
