

Clinical Trial Protocol

Iranian Registry of Clinical Trials

12 Jun 2026

Evaluation the effect of captopril in the treatment of definitive patients with COVID-19

Protocol summary

Study aim

Determining the interventional effect of captopril in the treatment of definitive patients with COVID-19 and its effect on pneumonia manifestations and clinical and laboratory symptoms of patients

Design

Clinical trial with control group, parallel, single blind, phase 3 on 40 patients, simple randomization method using closed door envelope

Settings and conduct

This study is performed with single blind (nurses registering patients' status) in the corona ward of Imam Reza Hospital in Mashhad on patients with COVID-19 pneumonia. Eligible patients with the same diet and underlying disease are divided into control and intervention groups after obtaining consent. Captopril treatment is performed for 14 days. After 14 days, the variables will be evaluated and the two groups will be compared.

Participants/Inclusion and exclusion criteria

Patients with Covoid 19 admitted with eligibility.
Inclusion criteria: Positive pcr test
Exclusion criteria: pregnant or lactating, hereditary angioedema, psoriasis, NSAID use

Intervention groups

In this study, patients with PCR confirmed COVID-19 are examined. First, patients who meet the inclusion criteria are selected. After obtaining the patient's consent, complement therapy with captopril is started. The recommended dose for this supplement is one 25 mg tablet every 8 hours for two weeks from the start of treatment. It has been tried that patients are on the same medication regimen and are similar in terms of variables such as age and underlying disease. Minimize the confounding effect of these variables.

Main outcome variables

Oxygen saturation rate; length of hospitalization; mortality rate

Scientific title

Evaluation the effect of captopril in the treatment of definitive patients with COVID-19

Public title

The effect of captopril on definitive patients with coronavirus pneumonia

Purpose

Supportive

Inclusion/Exclusion criteria

Inclusion criteria:

COVID-19 disease confirmed by imaging (HRCT) or Real Time PCR

Exclusion criteria:

Pregnancy Breastfeeding Bilateral renal artery stenosis Hereditary angioedema Psoriasis

Age

No age limit

Gender

Both

Phase

3

Groups that have been masked

- Care provider

Sample size

Target sample size: 40

Randomization (investigator's opinion)

Randomized

Randomization description

Simple randomization with table of random numbers available at "www.randomization.com" website will be used. Numbers will be placed in sealed envelopes and each envelope is assigned to one participant placing them in one of the two groups

Blinding (investigator's opinion)

Single blinded

Blinding description

Nurses recording the status of patients will be unaware of the intervention and control groups

Placebo

Not used

Assignment

Parallel

Other design features

Secondary Ids

empty

Health conditions studied

1

Description of health condition studied

Coronavirus pneumonia

ICD-10 code

U07.1

ICD-10 code description

This code assigned to a disease diagnosis of COVID-19 confirmed by laboratory testing

Primary outcomes

1

Description

Percentage of oxygen secretion

Timepoint

At the beginning of the study (before the intervention) and 14 days after the start of taking captopril

Method of measurement

Using a pulse oximeter

2

Description

Mortality rate

Timepoint

At the end of hospitalization of patients

Method of measurement

According to the physician report

3

Description

Duration of hospitalization

Timepoint

At the end of hospitalization of patients

Method of measurement

Calculated by the physician

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: In addition to the usual treatment

regimen, patients receive captopril at a dose of one 25 mg tablet every 8 hours for 2 weeks from the start of treatment.

Category

Treatment - Drugs

2**Description**

Control group: Patients in this group receive only routine treatment

Category

Treatment - Drugs
