The Effect of Mindfulness Exercises on Coronary Anxiety and Immune System on Clinical Psychology Students of Lahijan Islamic Azad University

Protocol summary

Study aim

The effect of mindfulness training on coronary anxiety and immune system on clinical psychology students of Lahijan Azad University

Design

The clinical trial has an intervention and control group. Statistical population of 160 people predicted on 30 students. Available and randomly (10 people in the experimental group, 10 people in the control group). students complete the questionnaire and take the antibody test and only the test group is trained. Then post-test was taken from both groups.

Settings and conduct

Semi-experimental and pre-test-post-test research design with control group. The statistical population of this research will consist of master's degree students in clinical psychology of Lahijan Azad University in the academic year 1399-1400. Students complete the questionnaire and take the corona antibody test. Only the intervention group is taught. A mindfulness training package will be used for intervention. Its based on mindfulness-based cognitive therapy. Its provided in 8 sessions (90 minutes) in the university class.

Participants/Inclusion and exclusion criteria

Students of Clinical Psychology, Lahijan Azad University.
Students who received the corona vaccine.

Intervention groups

Clinical psychology students undergoing mindfulness practice training. 10 people in the training group and 10 people in the control group. In connection with the therapeutic intervention, Beck Anxiety Questionnaire, Corona Antibody Test and Mindfulness Training Package will be used. students complete the questionnaire and perform antibody test. only the intervention group is trained in mindfulness. Its based on mindfulness-based cognitive therapy. Training is mindfulness with breathing, training to examine the body in detail, training to face dipole, familiarity with bodily senses, empathy and observation of thoughts without judgment.

Main outcome variables

Mindfulness, Corona Anxiety, Safety system

Intervention groups**1****Description**

Intervention group: Students of clinical psychology are Lahijan Branch of Azad University. The statistical population of this study will consist of all master students of clinical psychology studying at the Islamic Azad University, Lahijan Branch in the academic year 1399-1400. According to available statistics, the number of these people is 160. 20 students will be selected at random and will be randomly assigned to two groups (10 in the experimental group and 10 in the control group). In relation to therapeutic intervention and data collection, the following protocols and tools will be used:
- Mindfulness training package: In this research,

mindfulness training package will be used for intervention. This package is based on mindfulness-based cognitive therapy and was developed by Van Soon et al. (2011). The package is presented in 8 sessions (90 minutes) which includes mindfulness training with breathing, detailed body examination training, bipolar confrontation training, familiarity with bodily senses, empathy and observation of thoughts without judgment. . Mindfulness treatment program is performed for one month (4 weeks) twice a week for 90 minutes. Anxiety Scale: In this study, to measure the level of anxiety of the subjects, a scale made by Alipour et al. (1398) with 18 questions will be used. This questionnaire is scored in the 4-point Likert scale (never = 0, sometimes = 1, most times = 2 and always = 3). In total, the subjects' score varies between zero and 54. The high score in this questionnaire indicates a higher level of anxiety in individuals. Post-test sessions are also taken at the end.

Title and more details about the data/document

The total results obtained from the results of the questionnaire and testing and performance improvement will be published

When the data will become available and for how long

Access period starts from September 1400

To whom data/document is available

Data and other documents are available to all researchers in the field of research

Under which criteria data/document could be used

If other people request data and documentation, send a message to my personal email.

From where data/document is obtainable

Applicants should refer to Lahijan, Kashif Sharghi St., at the end of Shaghayegh St., Lahijan Branch of Azad University, to receive the required documents or data. Mahmood Rezaei Bosari by phone number 09377688854 and email mahmoodrezaei776@gmail.com Is responsive

What processes are involved for a request to access data/document

Applicants should call 09377688854 or send an email to mahmoodrezaei776@gmail.com to receive the required documents or data. Documents will be provided to them within 72 hours to a week.
