

Clinical Trial Protocol

Iranian Registry of Clinical Trials

24 Jul 2026

Evaluation of the effect of oral propranolol on hemodynamics and sedation of patients in stereotaxic surgery

Protocol summary

Study aim

Evaluation of the effect of oral propranolol on hemodynamics and sedation of patients in stereotaxic surgery

Design

Clinical trial with control group with parallel groups, phase 2-3 on 72 patients

Settings and conduct

This study is performed in Al-Zahra Hospital in Isfahan. Patients will be treated in two ways and the hemodynamics and sedation of patients will be recorded and compared.

Participants/Inclusion and exclusion criteria

Inclusion criteria: age between 20 and 65 years, informed consent to enter the study, candidate for stereotaxic surgery, lack of drug sensitivity
Exclusion criteria: changing the surgical plan for any reason, changing the anesthesia plan for any reason

Intervention groups

Intervention group: Patients in this group receive propranolol in a dose of 20 mg, 2 hours before the operation. Blood pressure and sedation of patients in this group will be measured in one, three, five, ten, fifteen minutes after the intervention and at the time of entering the recovery and every fifteen minutes in the recovery. Control group: Patients in this group receive placebo tablets, which are very similar to propranolol, 2 hours before the operation. Blood pressure and sedation of patients in this group will be measured in one, three, five, ten, fifteen minutes after the intervention and at the time of entering the recovery and every fifteen minutes in the recovery.

Main outcome variables

Blood pressure and sedation

Title and more details about the data/document

All data can be shared after people have requested.

When the data will become available and for how long

Six months after publishing the results.

To whom data/document is available

Academic researchers

Under which criteria data/document could be used

Scientific uses

From where data/document is obtainable

Website of the Research Committee of Isfahan University of Medical Sciences

What processes are involved for a request to access data/document

Clear request on the site to access the data by the individual and then review the request by the research assistant within 2 weeks and then allow access to the data.
