In- Vivo Bioequivalence study of Tadalafil tablet 5 mg Mofid Pharma with brand drugs (CIALIS® 5 mg, Lilly USA) in Iranian healthy volunteers.

Protocol summary

Study aim

In- Vivo Bioequivalence study of Tadalafil tablet 5 mg Mofid Pharma with brand drugs (CIALIS® 5 mg, Lilly USA) in Iranian healthy volunteers.

Design

Single dose, randomized, two sequences, two period crossover with a washout period.

Settings and conduct

This study will be conducted in single-dose, cross-over, and fasting, and on two sets of healthy volunteers. The study will be conducted in two periods of 72 hours. The interval between these two periods, which is called the wash-out time, is determined by the half-life of the drug plasma, which according to scientific sources should be at least 5 to 7 half-life of the drug in the case of the drug under study. The plan will take a week to clean up the drug, given the biological half-life of the drugs in the drug form. In the first round, candidates are divided into two groups, and the first group receives a test tablet and the second group receives similar tablets. Blood samples will be taken by the volunteer by the technician immediately after taking the drug, and the preparation steps of the samples, including plasma separation and drug extraction, are performed to analyze the amount of drug on them. All steps of the study will done in Simin Baspar Teyf Gostar Co.

Participants/Inclusion and exclusion criteria

The ages and BMIs of participants must be in the range of 18-60 and 18-28 respectively. Inclusion criteria: Hypersensitivity , History of drug or alcohol use and liver diseases.

Intervention groups

Single dose Tadalafil 5 mg Tablets Mofid Pharmaceuticals Company with brand drugs (CIALIS® 5 mg, Lilly USA)

Main outcome variables

Determination of blood drug concentration

Scientific title

In- Vivo Bioequivalence study of Tadalafil tablet 5 mg Mofid Pharma with brand drugs (CIALIS® 5 mg, Lilly USA) in Iranian healthy volunteers.

Public title

In-vivo Bioequivalence study of Tadalafil tablet with brand drugs (CIALIS Lilly USA)

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

General health Body mass index(18-28) Informed consent Age(18-60)

Exclusion criteria:

Smoking A history of cardiovascular disease A history of liver & kidney disease Pregnancy Alcohol & Drug addiction Hypersensitivity to the drug

Age

From **18 years** old to **60 years** old

Gender

Both

Phase

Bioequivalence

Groups that have been masked

- Participant

Sample size

Target sample size: **24**

Randomization (investigator's opinion)

Randomized

Randomization description

For this purpose, the name of total volunteers (24 people) are written on paper pieces and placed to the bottle after wrapped into the aluminum foils. the papers Withrow from bottle randomly. the first and second 12 names randomly taken from the bottle are considered as group A and group B respectively.

Blinding (investigator's opinion)

Single blinded

Blinding description

Iranian Tadalafil tablets and Tadalafil brand are removed from their packaging by the executor and placed in similar and coded cans. Volunteers will not be informed about receiving the brand or test medications

Description of health condition studied

Bio equivalence test

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description

Determination of blood drug concentration.

Timepoint

Sampling times in this study will be 0, 1, 2, 2:30, 3, 3:20, 3:40, 4, 4:20, 4: 40, 5, 6, 8, 10, 12, 24, 48, 72 hours After prescribing the tablet.

Method of measurement

High Performance Liquid Chromatography with tandem mass spectroscopy detector

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: will receive one test drug tablet (Tadalafil tablet 5 mg Mofid Pharma Pharmaceuticals). Blood samples will be taken from the volunteers for 72 hours at the mentioned times after drug administration and the concentration of Tadalafil in blood samples will be measured by liquid chromatography with mass spectroscopy detector.
