Iranian Registry of Clinical Trials

02 Aug 2026

The effect of spiritual therapy on resilience of mothers following abortion

Protocol summary

Study aim

Main purpose: To determine the effect of spiritual therapy on resilience of mother's following abortion Sub-objective: 1) Determining and comparing the average resilience score mothers following abortion in the intervention and control group before the intervention 2) Determining and comparing the average resilience score of mothers following abortion in the intervention and control group after the intervention 3) Determining and comparing the average resilience score of mothers following abortion in the intervention and control group before and after the intervention

Design

Random clinical trial with control group- without blinding- on 68 patients. the individuals are divided into intervention and control groups using random blocking

Settings and conduct

The research environment will be Al-Zahra hospital in rasht. The sessions will be held in 8 sessions for 4 weeks (twice weeks). the duration of the sessions will be 60 minutes

Participants/Inclusion and exclusion criteria

Entry conditions: Abortion before 20 weeks- minimum literacy- lack of known physical and psychiatric illness based on the patient's statement and not taking medication related to these illnesses- willingness to participate in the study Exit conditions: Reluctance to continue participating in the study- failure to attend more than two training sessions

Intervention groups

Spiritual therapy will be performed in 8 sessions for 4 weeks (twice a week). The duration of the sessions will be 60 minutes. meeting will be based on the protocol Kajbaf et al. the control group will receive routine care and will be given a spiritual therapy protocol at the end of the work

Main outcome variables

resilience mothers following abortion

Groups that have been masked

No information

Sample size

Target sample size: 68

Randomization (investigator's opinion)

Randomized

Randomization description

Assignment of samples to intervention (A) and control (B) groups (34 people in each group) will be done using blocks with size of 4. In this way, 6 possible modes will be considered using a table of random numbers. These 6 modes are written on 6 separate cards and the cards will be placed in a black bag (for concealment) . A card will be issued for 17 times to finally get 68 letters written as the sample size. The intervention group will be the group that will receive spiritual therapy sessions, and the control group will be the group that will receive only the routine cares.

Description

The resilience score that individuals obtain from the Connor and Davidson Resilience Questionnaire

Timepoint

Before the intervention and at the end of the eighth session

Method of measurement

Connor and Davidson Resilience Questionnaire

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: individuals are trained in spiritual therapy in 8 sessions (twice a week) for 4 weeks for 60 minutes. Once before the intervention and once after the training sessions, the reliance questionnaire will be filled out by the intervention group,. spiritual therapy training will be provided based on the package of kajbaf et al. the content of the meetings is as follows.session1: in this session, hope and empathetic relationship are discussed. Session 2: In this session, the first premise (spiritual human being) and the second premise that pleasant and unpleasant feelings are not dependent on phenomena but on inner feelings will be discussed. In this session, the promotion of intentions and purposeful behaviors and positive mental imagery towards God will be taught. Session 3: Includes the third premise which is the

principle of action. This principle is based on the attributes of God's mercy and generosity. That is, God always provides the opportunity for human growth, and the fourth premise (divisibility: means that worldly affairs can be divided into changeable and immutable affairs). Session 4: In this session, the fifth premise (the moral world is created and always moving in the direction of happiness) will be taught. The strategy of prayer and its place in human life and increasing women's resilience following abortion and reducing anxiety and stress will be taught. Session 5: It is based on the principle that the future is not entirely in our hands. In this session, the strategies of remembrance, trust and hope in God will be discussed. Session 6: It is based on the principle that man is constantly in touch with God. In this session, the position of patience as a strategy to increase women's resilience following abortion, increase the quality of married life and deal with anxiety will be taught. Session 7: It is based on this principle that the eighth premise (spiritual man lives with his attributes, not with his property and possessions) and the ninth premise (achieving spiritual life requires charity, forgiveness, forgiveness and love). Session 8: Default (understanding the meaning of hardships and responsibilities to God, self, others and the universe).
