Thesis Title: Investigating the effect of nurse -led telephone based follow-up on the participation rate of firstdegree relatives of elderly patients with glaucoma in screening program

Protocol summary

Study aim

Determining the effect of nurse telephone follow-up on the participation of primary family members of the elderly with glaucoma in the screening program

Design

The trial in the field of random trial field is in parallel on two control and test groups with 110 samples by quadruple random blocks method and with the guidance of methodology consultant and analysis with SPSS software.

Settings and conduct

The study site is Mahdkramat Ophthalmology Clinic in Semnan. Samples are selected from first-degree relatives 35 years and older of patients with glaucoma who have recently been diagnosed by an ophthalmologist

Participants/Inclusion and exclusion criteria

Inclusion criteria nclude: 1- First-degree relatives (parents, children, siblings) of the elderly referring to the eye clinic whose glaucoma has been confirmed by an ophthalmologist during the last three months 2. Have access to the telephone at home 3. At least one family member is 35 years old or older exclusion criteria nclude: 1- Not wanting to participate in the study 2. Impossibility of communication with the patient's family 3. The patient's family member is involved in other clinical studies of glaucoma screening

Intervention groups

The intervention group includes a relative of 35 years and older with glaucoma who is screened and encouraged to receive treatment by telephone and is finally trained.

Main outcome variables

Participation rate in glaucoma screening test

Title and more details about the data/document

The results of the screening questionnaire of first-degree relatives of elderly patients with glaucoma will be statistically analyzed and reported after non-identification of individuals.

When the data will become available and for how long

The access period will start six months after the results are published.

To whom data/document is available

Access to the data of this study is free.

Under which criteria data/document could be used

Studying the documents and using the questionnaire and data obtained from the study is free

From where data/document is obtainable

Corresponding author: Farahnaz Farnia, PhD; Research Center for Nursing and Midwifery Care, Nursing-Midwifery School of Shahid Sadoughi University, Boali St, Safaeye, Postal code 8916877391, Yazd, Iran Tel: +98 35 38245777; Fax: +98 351 8249705; Email: far.farnia@yahoo.com

What processes are involved for a request to access data/document

The applicant can receive the documents after sending the application by email and also by phone and coordination.
