Clinical trial of the effect of fish oil supplementation compared with the placebo on mental health parameters and biomarkers of oxidative stress in women with polycystic ovary syndrome

Protocol summary

Summary

Objective: The aim of this study is to determine the effects of fish oil supplementation on mental health parameters and biomarkers of oxidative stress in patients with polycystic ovary syndrome. Study design: Parallel double-blind (both patients and researchers) randomized controlled clinical trial. Random assignment will be done by the use of computer-generated random numbers. Inclusion criteria: Patients with polycystic ovary syndrome and aged 18 to 40 years will be included in this study. Exclusion criteria: Unwillingness to cooperate will be excluded in the study. Population and sample size: 60 patients with polycystic ovary syndrome of eligible and referred to Kosar Clinic affiliated to Arak University of Medical Sciences, Arak, Iran in the study will be selected. Intervention: Patients will be assigned to receive either fish oil (n=30) or placebo (n=30). Fish oil and placebos capsules are similar in shape and size. Fasting blood samples will be taken at baseline and 12 weeks after the intervention. At the beginning and end of the intervention: 12 weeks. Outcomes: Mental health parameters (primary outcomes) and biomarkers of oxidative stress will be quantified at study baseline and end-of-trial.

Scientific title

Clinical trial of the effect of fish oil supplementation compared with the placebo on mental health parameters and biomarkers of oxidative stress in women with polycystic ovary syndrome

Public title

Effect of supplementation in treatment of women with polycystic ovary syndrome

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria: Patients with PCOS according to Rotterdam criteria; aged 18 to 40 years. Exclusion criteria: Unwillingness to cooperate.

Age

From **18 years** old to **40 years** old

Gender

Female

Phase

2

Groups that have been masked

No information

Sample size

Target sample size: **60**

Randomization (investigator's opinion)

Not randomized
