Evaluation the effect of adipose derived stem cells conditioned medium (ADSC-CM) on rejuvenation after resurfacing with ablative fractional carbon dioxide laser

Protocol summary

Study aim

Evaluation the effect of adipose derived stem cells conditioned medium (ADSC-CM) on rejuvenation after resurfacing with ablative fractional carbon dioxide laser

Design

Clinical trial with a control group and an intervention group, with parallel groups, double-blind, randomized based on random number table, phase 1 on 10 patients with moderate and severe wrinkles

Settings and conduct

This project is carried out in the Dermatology and Stem Cell Research Center of Tehran University of Medical Sciences. One group is treated with laser and adipose derived stem cells conditioned medium topically and the other group is treated with laser and PRP topically.

Participants/Inclusion and exclusion criteria

Inclusion criteria: Age between 20-60; Having moderate wrinkles on the face. Exclusion criteria: Pregnancy and breastfeeding; Active infection in face; Using any injectable fillers on the face in the last six months

Intervention groups

Intervention group: A group treated with laser and adipose derived stem cells conditioned medium is placed topically. Control group: The other group is treated with laser and PRP topically.

Main outcome variables

The amount of wrinkles; side effects; patient's satisfaction

Scientific title

Evaluation the effect of adipose derived stem cells conditioned medium (ADSC-CM) on rejuvenation after resurfacing with ablative fractional carbon dioxide laser

Public title

Evaluation of clinical improvement of conditioned media

of adipose derived stem cells in the treatment of wrinkles in the facial skin

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

Age between 20-60 Having middle wrinkles in face region

Exclusion criteria:

Pregnancy and breastfeeding History of cancer Patients with a new history of gel and Botox injections People with Mental Disorders Active infection in the face

Age

From **20 years** old to **60 years** old

Gender

Both

Phase

1

Groups that have been masked

- Outcome assessor
- Data analyser

Sample size

Target sample size: **20**

Randomization (investigator's opinion)

Not randomized

Randomization description

Blinding (investigator's opinion)

Double blinded

Blinding description

In each session, immediately after fractional laser, adipose-derived stem cells conditioned medium are used in one group and PRP is used in the other group after laser.

Placebo

Not used

Assignment

Parallel

Description of health condition studied

Skin aging

ICD-10 code

L90.9

ICD-10 code description

Atrophic disorder of skin

Primary outcomes

1

Description

The amount of wrinkles

Timepoint

Before treatment and six month after the last session

Method of measurement

Visio face

Secondary outcomes

1

Description

Inflammation

Timepoint

After each session

Method of measurement

Questionnaire and visit

2

Description

Intensity of pain

Timepoint

Treatment time

Method of measurement

Questionnaire and visit

Intervention groups

1

Description

Intervention group: After adequate anesthesia, a group is first treated with laser and then the stem cells conditioned medium is applied topically to the wrinkle site for one hour. This method is repeated 3 times with 4 week intervals.
