Comparative bioequivalence study of the Dutasteride 0.5-mg capsules manufactured by Zahravi Pharmaceutical Company with Dutasteride brand capsules (Avodart®) by GlaxoSmithKline (GSK).

Protocol summary

Study aim

Demonstration of bioequivalence of Dutasteride capsule 0.5 mg of Zahravi Pharmaceutical Company with Avodart® capsule manufactured by GlaxoSmithKline (GSK) after single dose administration.

Design

Single dose, randomized and crossover bioequivalence study of Dutasteride capsule 0.5 mg by Zahravi Co. with Avodart® (GlaxoSmithKline (GSK)) in 24 healthy male volunteers in two groups.

Settings and conduct

Study place and the place for blood sample analysis are the Drug Applied Research Center affiliated to Tabriz University of Medical Science, respectively. 24 healthy male volunteers will receive one of the two 0.5 mg Dutasteride capsules test or reference in random sequence according to the randomization schedule. The interval between receiving the medicine (washout period) is 28 days, If the first sequence receives Iranian medicine, they will receive brand medicine. Blood samples will be taken from all participants before and after receiving the drug at 0.5, 1, 1.5, 2, 2.5, 3, 4, 6, 8, 12, 24, 48 and 72 hours after dosing.

Participants/Inclusion and exclusion criteria

Inclusion criteria: Healthy male subjects in the age range of 18-60 years and BMI (Body Mass Index) of 18-30. Exclusion criteria: Subjects with Blood Pressure \leq 90/60 mm/Hg or BP \geq 140/90 mm/Hg. Any evidence of impairment of renal, hepatic, cardiac, lung or gastrointestinal function or a history of tuberculosis, epilepsy, asthma, diabetes, psychosis or glaucoma and regular smoker.

Intervention groups

Intervention group 1: Dutasteride capsule 0.5 mg by Zahravi Co. is the test product. Intervention group 2: Avodart® (GlaxoSmithKline (GSK)) is the reference product. In each period, 12 of 24 subjects will be given

single dose of this product. After the washout period, the volunteers are placed in the opposite group.

Main outcome variables

Peak Plasma Concentration (C_{max}); Area under the concentration-time curve (AUC).

Scientific title

Comparative bioequivalence study of the Dutasteride 0.5-mg capsules manufactured by Zahravi Pharmaceutical Company with Dutasteride brand capsules (Avodart®) by GlaxoSmithKline (GSK).

Public title

Study of absorption and elimination rate of Dutasteride capsules 0.5 mg in comparison with Dutasteride brand capsules (Avodart®).

Purpose

Treatment

Inclusion/Exclusion criteria**Inclusion criteria:**

The weight limit of each volunteer should be between 60 and 100 kg. All volunteers must be non-smokers. They must be healthy in terms of liver, kidney, respiratory system, mental and other general health characteristics that will be assessed. Candidates who have consented to the consent form.

Exclusion criteria:

Known hypersensitivity or idiosyncratic reaction to Dutasteride or any ingredients. Subjects with BP ≤ 90/60 mm/Hg or BP ≥ 140/90 mm/Hg. Regular smoker who smokes more than ten cigarettes daily. Taking any medicine during two weeks before dosing.

Randomization (investigator's opinion)

Randomized

Randomization description

To randomly assign people in two groups, 24 cards with numbers 1 to 24 will be used in closed envelopes that are arranged irregularly. Each candidate will pick up an envelope after entering the study, and numbers 1-12 will be in group A and numbers 13-24 will be in group B. Group A will receive intervention 1 and group B will receive intervention 2, and after the first period, the interventions of the both groups will change for the second period.

AUC (Area Under the Concentration-Time Curve)

Timepoint

At 0 (before dosing), 0.5, 1, 1.5, 2, 2.5, 3, 4, 6, 8, 12, 24, 48 and 72 hour after dosing.

Method of measurement

Using non-compartmental model of Win-Nonlin

Professional software version 3.2.A (Pharsight Corporation, USA) or SPSS

Intervention groups

1

Description

Intervention group 1: In this group, volunteers are given a single oral dose of Dutasteride capsules 0.5 mg produced by Zahravi Co. (Domestic). In each period, 12 of 24 subjects will be given single oral dose of this product. After the washout period, the volunteers are placed in the Intervention group 2.
