The Effectiveness of Schema Mode Therapy on Emotional Maturity, Ambiguity tolerance and Ego Strength in the Students Suffered from Romantic relationship breakup

Protocol summary

Study aim

Determining the effectiveness of subjective schema therapy on my emotional maturity, ambiguity tolerance and strength in students with emotional failure.

Design

The current research is an experimental type with a pre-test-post-test design, with two control and experimental groups. Randomization was used on 30 students with emotional failure.

Settings and conduct

The statistical population of this research is all students of Rasht Azad University who experienced emotional failure. The participants will complete questionnaires of emotional maturity, ambiguity tolerance, self-strength or psychological strength, and love shock, and only the intervention group will be subjected to schema-oriented mindset therapy, and a post-test will be conducted at the end.

Participants/Inclusion and exclusion criteria

Entry requirements: 1.Age 18 to 20 years 2.Obtaining a higher than average score in the love shock questionnaire, 3. The desire of the therapist to attend the sessions, 4. Being a student and having sufficient intelligence, 5.Not taking medication. Exit conditions: 1.Absence of more than two sessions, 2.The patient's unwillingness to continue the treatment, 3.Not suffering from psychotic disorders.

Intervention groups

After completing the questionnaires, the participants in the research are divided into two groups, and the intervention group is subjected to the mindset-oriented treatment schema, and in the intervention group, they are given the consent form to participate in the research, and the purpose and structure of the treatment are explained. and the control group does not receive the treatment and then at the end of the post-test in both groups.

Main outcome variables

Emotional maturity, tolerance of ambiguity, ego strength, emotional failure.

Randomization (investigator's opinion)

Randomized

Randomization description

The randomization method is a simple randomization. The study has two groups and from the beginning it is agreed that odd numbers will be given to the intervention group and even numbers will be given to the control group. Then, using the random number table, the relevant numbers are extracted, each number is written on a card and placed in an envelope, and the envelopes are sealed, and the patient's number is written on each envelope, and the first patient who entered the study Envelope number 1, patient number 2, envelope number 2 and so on will be given. Finally, people in two intervention groups (15 people) and control group (15 people) will enter the research.

Intervention groups

1

Description

Intervention group: 30 students will be randomly selected and will be assigned in two intervention groups (15) and control group (15). Both groups initially and at the end of the participants, the emotional maturity of Yushumin and Bahargawa, McLin (Mstat-II), my strength, or psychological strength (ESS), as before The conscious consent form is provided to the participants and is presented on the purpose and structure of treatment, how to hold treatment sessions of the required description and answer questions. The intervention group will receive the schema therapy of mindfulness during 8 treatment sessions twice a week in a group. The general treatment plan is as follows; First session; Teaching mindsets and schemas. Purpose: To familiarize people with how schemas and mentalities work, a brief explanation of schemas and a complete explanation of mentalities are given. Second session; Acquaintance of people with incompatible coping mindsets. Objective: Familiarity with the behaviors of people's incompatible confrontational mindsets, behavioral exercises for incompatible confrontational mindsets, advantages and disadvantages of incompatible confrontational mindsets, cognitive distortions of incompatible confrontational mindsets and agreeing with incompatible confrontational mindsets. third session; Acquainting people with parent's mentalities was ineffective. Purpose: historical role playing, writing a weekly positive list, instructions for the identity circle, cognitive distortions of the over-expectant parent mentality and giving training cards to combat the dysfunctional parent mentality. Fourth Session; Acquaintance of people with the mentality of a vulnerable child. Purpose: To perform new techniques to relieve the mentality of a sad vulnerable child, to learn about the fears of a vulnerable child, to learn about the needs and rights of children, and to give educational cards for the mentality of a vulnerable child. fifth meeting; Familiarizing people with the mentality of an angry child. Purpose: to give educational cards for the mentality of an impulsive child, the reaction of others to the mentality of an angry child, identifying the needs of an angry child and the healthy need for attention, the sixth session; Familiarizing people with the mentality of a

happy child. Goal: To stimulate the mentality of a happy child, the interests of a happy child's mentality and positive feedback for the mentality of a happy child. Seventh session; Getting to know people with a healthy adult mindset. Purpose: to give behavioral exercises for healthy adult mentality, getting to know your healthy adult mentality and your healthy adult mentality and the future. Eighth session; Retaking relevant tests to measure the effectiveness of treatment sessions.

Title and more details about the data/document

All the data obtained from the questionnaire and test results will be published.

When the data will become available and for how long

The access period starts 6 months after the results are published

To whom data/document is available

Documents and data will be available to all researchers in the field of research being studied.

Under which criteria data/document could be used

If researchers request data and documents, send a message to a personal email.

From where data/document is obtainable

To receive documents and data, researchers should call 09118340599 or send an email to anita.najafi0599@gmail.com.

What processes are involved for a request to access data/document

To receive documents and data, researchers should call 09118340599 or send a message to anita.najafi0599@gmail.com, information will be available to them within 72 hours or one week.
