

Clinical Trial Protocol

Iranian Registry of Clinical Trials

27 May 2026

Effect of fast and slow intravenous streptokinase infusion on coronary re-perfusion in patients with acute myocardial infarction.

Protocol summary

Summary

The aim of this study was to determine of fast and slow intravenous streptokinase infusion effect on coronary re-perfusion in patients with acute myocardial infarction. This was a randomized clinical trial, So that 100 patients with acute myocardial infarction were randomly selected for the intervention and comparison in two groups, intervention group (fast or half-hour intravenous infusion) and control group (one-hour infusion or slow)(50 patients in each group). Inclusion criteria were: 1- acute myocardial infarction with any contraindication for streptokinase injection 2- Equal to or greater than one mm ST elevation in two contiguous leads and exclusion criteria were: 1- No ECG or echo to file.2- Not consent to participate in the study. Among 1.5 million units of streptokinase was administered to each patient in the two groups and ECG and Echo results before infusion and 6 hours after infusion and laboratory findings were recorded. Also Complications during and after injection were observed and recorded.

Health conditions studied**1****Description of health condition studied**

myocardial infarction

ICD-10 code

I21

ICD-10 code description

myocardial infarction specified as acute or with a stated duration of 4 weeks (28 days) or less from onset

Primary outcomes**1****Description**

Coronary reperfusion

Timepoint

Before and 6 hours after infusion

Method of measurement

by decending of ST piece in ECG

Secondary outcomes**1****Description**

Cardiac complications

Timepoint

before injection and 6 hours after injection

Method of measurement

ECG

2**Description**

Hematologic effects

Timepoint

before injection and 6 hours after injection

Method of measurement

measurement of INR and PT

Intervention groups**1****Description**

Intervention was in how to infusion of 1/5 million unit of streptokinase with zikinase Brand owned company of Zist Daru Danesh, Intervention 1: Rapid infusion in 5% Dextrose at 30 minutes and
