Comparative bioequivalence study of the Domperidone 1 mg/mL Suspension produced by Nona Darou Pars Pharmaceutical Company versus Motilium® (Janssen company)

Protocol summary

Study aim

Demonstration of bioequivalence of Domperidone suspension 1 mg/mL of Nona Darou Pars Pharmaceutical Company with Motilium® suspension manufactured by Janssen after single dose administration.

Design

Single dose, randomized and crossover bioequivalence study of Domperidone suspension 1 mg/mL by Nona Darou Pars Co. with Motilium® (Janssen) in 24 healthy male volunteers in two groups.

Settings and conduct

Study place and the place for blood sample analysis are the Drug Applied Research Center affiliated to Tabriz University of Medical Science, respectively. 24 healthy male volunteers will receive 20 cc of the two 1mg/ml domperidone suspensions test or reference in random sequence according to the randomization schedule. The interval between receiving the medicine (washout period) is 7 days. Blood samples will be taken from all participants before and after receiving the drug at 0.25, 0.5, 0.75, 1, 1.5, 2, 2.5, 3, 4, 6, 8, 12, 24, 36 and 48 hours after dosing.

Participants/Inclusion and exclusion criteria

Inclusion criteria: Healthy male subjects in the age range of 18-60 years and BMI (Body Mass Index) of 18-30. Exclusion criteria: Subjects with Blood Pressure \leq 90/60 mm/Hg or BP \geq 140/90 mm/Hg. Any evidence of impairment of renal, hepatic, cardiac, lung or gastrointestinal function or a history of tuberculosis, epilepsy, asthma, diabetes, psychosis or glaucoma and regular smoker.

Intervention groups

Intervention group 1: Domperidone suspension 1 mg/mL by Nona Darou Pars Co. is the test product. Intervention group 2: Motilium® (Janssen) is the reference product. In each period, 12 of 24 subjects will be given single dose of this product. After the washout period, the

volunteers are placed in the opposite group.

Main outcome variables

Peak Plasma Concentration (C_{max}); Area under the concentration-time curve (AUC).

Scientific title
Comparative bioequivalence study of the Domperidone 1 mg/mL Suspension produced by Nona Darou Pars Pharmaceutical Company versus Motilium® (Janssen company)

Public title
Study of absorption and elimination rate of Domperidone suspension 1 mg/ml in comparison with Domperidone brand suspension (Motilium®).

Purpose
Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

The weight limit of each volunteer should be between 60 and 100 kg. All volunteers must be non-smokers. They must be healthy in terms of liver, kidney, respiratory system, mental and other general health characteristics that will be assessed. Candidates who have consented to the consent form.

Exclusion criteria:

Known hypersensitivity or idiosyncratic reaction to Domperidone or any ingredients. Subjects with BP \leq 90/60 mm/Hg or BP \geq 140/90 mm/Hg. Regular smoker who smokes more than ten cigarettes daily. Taking any medicine during two weeks before dosing.

Randomization (investigator's opinion)
Randomized

Randomization description
To randomly assign people in two groups, 24 cards with numbers 1 to 24 will be used in closed envelopes that are arranged irregularly. Each candidate will pick up an envelope after entering the study, and numbers 1-12 will be in group A and numbers 13-24 will be in group B. Group A will receive intervention 1 and group B will receive intervention 2, and after the first period, the interventions of the both groups will change for the second period.

Primary outcomes

1

Description

Peak Plasma Concentration (Cmax)

Timepoint

At 0 (before dosing), 0.25, 0.5, 0.75, 1, 1.5, 2, 2.5, 3, 4, 6, 8, 12, 24, 36 and 48 hour after dosing

Method of measurement

High-performance liquid chromatography—mass spectrometry (HPLC-MS-MS)

Secondary outcomes

1

Description

AUC (Area Under the Concentration-Time Curve)

Timepoint

At 0 (before dosing), 0.25, 0.5, 0.75, 1, 1.5, 2, 2.5, 3, 4, 6, 8, 12, 24, 36 and 48 hour after dosing

Method of measurement

Using non-compartmental model of Win-Nonlin Professional software version 3.2.A (Pharsight Corporation, USA) or SPSS

Intervention groups

1

Description

Intervention group 1: In this group, volunteers are given a single oral dose of Domperidone suspension 1 mg/mL produced by Nona Darou Pars Co. (Domestic). In each period, 12 of 24 subjects will be given single oral dose of this product. After the washout period, the volunteers are placed in the Intervention group 2.
