

Clinical Trial Protocol

Iranian Registry of Clinical Trials

21 Jul 2026

Comparison of the effectiveness of parent management training sessions through internet based, live, intractive with face-to-face sessions on reducing the symptoms of children with attention deficit hyperactivity disorder.

Protocol summary

Study aim

Determining and comparing the average score of behavior problems, social problems, psychosomatic problems, social phobia, Attention Deficit Disorder (ADD), hyperactivity disorder (HD), attention deficit hyperactivity disorder (ADHD) in two methods of live communication through the Internet and face-to-face through interactive parent management training sessions.

Design

A clinical trial with a control group, with a parallel group, without blinding, randomized, on 92 patients, which is used for randomization using the rand function of Excel software.

Settings and conduct

Randomized clinical trial study method. Parents of children suffering from attention deficit and hyperactivity disorder are receiving drug treatment in Amin and Khurshid Educational Center, Isfahan University of Medical Sciences and Health Services, Department of Psychiatry.

Participants/Inclusion and exclusion criteria

The inclusion criteria included student aged 3 to 12 years referred to Khorshid and Amin Psychiatric Clinic, attentions deficit hyperactivity disorder based on DSM-5, and medication therapy. Exclusion criteria included having any chronic illness, no internet access, and any inability to communicate.

Intervention groups

Intervention group1: This group is comprised of parents who attend online classes. The subject of the course would be PMT (parent management training). The six sessions of this course are held once a week.
Intervention group2: This group is comprised of parents who attend face-to-face classes. The subject of the course would be PMT (parent management training). The

six sessions of this course are held once a week.

Main outcome variables

Severity of Attention Deficit Hyperactivity Disorder.

Scientific title

Comparison of the effectiveness of parent management training sessions through internet based, live, interactive with face-to-face sessions on reducing the symptoms of children with attention deficit hyperactivity disorder.

Public title

Comparing the effectiveness of face-to-face and online parent management training classes for parents of children with hyperactivity.

Purpose

Education/Guidance

Inclusion/Exclusion criteria**Inclusion criteria:**

Child 3-12 years old Diagnosis of ADHD according to DSM-V

Exclusion criteria:

Intellectual disability or borderline intelligence
Concomitant physical disorder Psychological comorbidities Parents' unwillingness to participate in the study

AgeFrom **3 years** old to **12 years** old**Gender**

Both

Phase

N/A

Groups that have been masked*No information***Sample size**Target sample size: **92****Randomization (investigator's opinion)**

Randomized

Randomization description

The method is premature mature block randomization. In this way, first we using online software (sealed envelope), a sequence of random numbers will be created and by the same software, the generated number will be divided in to 46 block of 2. Which is an equal number in which block will be 1 item from the intervention group and 1 item from control group. So by doing each block, 1 patient (equal) will be assigned to each group.

Blinding (investigator's opinion)

Health conditions studied**1****Description of health condition studied**

Attention deficit and hyperactivity disorder

ICD-10 code

F90

ICD-10 code description

Attention-deficit hyperactivity disorders

Primary outcomes**1****Description**

Severity of Attention Deficit hyper Activity Disorder.

Timepoint

Before the intervention, Immediately after the end of the intervention and two months after the end of the intervention.

Method of measurement

Using Connors 3rd edition and SNAP-IV questionnaires.

Secondary outcomes**1****Description**

Severity of attention deficit hyperactivity disorder.

Timepoint

Two months after the end of the sessions.

Method of measurement

Using Connors 3rd edition and SNAP-IV questionnaires.

2**Description**

Severity of attention deficit.

Timepoint

Two months after the end of the sessions.

Method of measurement

Using Connors 3rd edition and SNAP-IV questionnaires.

3

Description

Severity of hyperactivity.

Timepoint

Two months after the end of the sessions.

Method of measurement

Using Connors 3rd edition and SNAP-IV questionnaires.

4

Description

Severity of conduct disorder.

Timepoint

Two months after the end of the sessions.

Method of measurement

Using Connors 3rd edition and SNAP-IV questionnaires.

5

Description

Severity of social problems.

Timepoint

Two months after the end of the sessions.

Method of measurement

Using Connors 3rd edition and SNAP-IV questionnaires.

6

Description

Severity of psychosomatic problems.

Timepoint

Two months after the end of the sessions.

Method of measurement

Using Connors 3rd edition and SNAP-IV questionnaires.

7

Description

Severity of generalized anxiety disorder.

Timepoint

Two months after the end of the sessions.

Method of measurement

Using Connors 3rd edition and SNAP-IV questionnaires.

Intervention groups

1

Description

Intervention group: This group is comprised of parents who attend online classes. The subject of the course would be PMT (parent management training). The six sessions of this course are held once a week. The first session is on children psychology and familiarizing with attention deficit hyperactivity disorder, its etiology, prognosis and treatments. The second session is on

commanding. The third one is on strengthening the communication with the child in order to achieve better obedience. The forth and the fifth sessions are about types of encouragement and discipline respectively. The sixth session is on the negative impact of certain situations on child's misbehavior (e.g., hunger and peer effect). At the beginning of each session, the parents can ask questions about the last sessions and at the end of the session they are guided on specific homework that they are supposed to send to the instructor for review.
