

Clinical Trial Protocol

Iranian Registry of Clinical Trials

04 Jul 2026

Comparison of the effectiveness of aerobic, anaerobic and yoga exercises on the level of anxiety of the medical staff during the peak of the corona virus

Protocol summary

Study aim

A comparison of aerobic and anaerobic yoga exercises on reducing the risks of the medical staff during the peak of Corona

Design

The clinical trial will have 3 test groups and a control group, which will be done by random sampling with statistical software.

Settings and conduct

This plan will be carried out in the Medical Sciences Hospital of Kherameh city in the form of an intervention that will be carried out during 8 one-hour sessions in the protocol of aerobic and anaerobic exercises and yoga with the experimental group, and the control group will not receive any intervention.

Participants/Inclusion and exclusion criteria

Conditions for entering the research: Volunteer employees who are able to cooperate
Exit conditions: No use of psychiatric drugs

Intervention groups

In this intervention, we will improve the anxiety caused by Corona. This research is a semi-experimental and field study with a pre-test and post-test design with a control group and using the selection of subjects in the test and control groups, in which the effectiveness of the independent variable (three sports styles, aerobic and anaerobic exercises) will be compared and yoga will be investigated on the dependent variable of anxiety. The selection of employees is a random cluster type that we will conduct intervention with 3 experimental groups during eight sessions, and the control group will not receive any intervention

Main outcome variables

anxiety

Title and more details about the data/document

Based on the questionnaires and field research, she investigated and analyzed the data

When the data will become available and for how long

After the completion of the research project and statistical data analysis, it will be possible to access the data

To whom data/document is available

Executive and research officer of the university

Under which criteria data/document could be used

It can be used as the use of research findings and discretion of the university authorities

From where data/document is obtainable

Refer to the person in charge of the research project

What processes are involved for a request to access data/document

The application can be implemented by taking the listed numbers or emailing the executive or the person in charge of the research project while coordinating with the relevant authorities.
