

# Clinical Trial Protocol

## Iranian Registry of Clinical Trials

26 May 2026

### Compared celox with using a compression bandage and compression bandage alone at time of bleeding control in patients with penetrating wounds of the extremities

#### Protocol summary

##### Summary

In this randomized clinical trial on patients with penetrating trauma will be done during the study period, patients with penetrating wounds from knives, glass and car accidents with intentional or unintentional mechanism of injury to Imam Hossein hospital will be divided into experimental and control conditions. Inclusion criterias in the study were penetrating wounds in the extremities, aged 18 to 50 years, and lesion with length greater than 3 cm and less than 15 cm. Celox to the extent required in the experimental group and the control group plus pressure dressing will be used to stop bleeding. Duration of time to bleeding control will be recorded. In order to measure of the amounts of bleeding after treatment, 10 × 10 eight layers of celox gases that are used to control bleeding counts, blood-stained gas equivalent to 20 cc of blood are considered. Other variables such as demographic data and vital signs, methods and extent of hydration of patients in both groups will be determine.

##### Scientific title

Compared celox with using a compression bandage and compression bandage alone at time of bleeding control in patients with penetrating wounds of the extremities

##### Public title

Compared celox with pressure bandages at time of bleeding control in penetrating extremity wounds

##### Purpose

Treatment

##### Inclusion/Exclusion criteria

Inclusion criteria: 1-Penetrating wounds in extrimities with sharp objects and accidental or non accidental mechanism of injury. 2- Age 18 to 50 years 3- Length of

lesion greater than 3 cm and less than 15 cm. Exclusion criteria: 1- Foreign body in ulcer 2- There are coagulation defects and anticoagulation drugs 3- The patient has hypovolemic shock 4- The same material used to control clotting 5 - The patients needs to receive blood or blood products

**Age**

From **18 years** old to **50 years** old

**Gender**

Both

**Phase**
