The effect of educational intervention based on protection-motivation theory on oral health literacy promotion among female high school students

Protocol summary

Summary

This study is an educational randomized controlled trial. The purpose of this study is to determine the effect of educational intervention based on protection motivation theory on oral health literacy promotion. 180 students are selected by a multistage cluster sampling from four secondary schools of the zone 2 and 4 of Shiraz education after elimination of special schools (gifted, non-profit and exceptional) and assign into experimental and control groups. The data is obtained by using oral health literacy and protection motivation theory questionnaire before and after the educational intervention. Inclusion criteria are being female students studying at ninth grade of high school in Shiraz and willingness to participate in the study and exclusion criteria are unwillingness to continue participating in research, absence in the pre-test or post-test, absence of more than one session in educational classes and incomplete filling of questionnaires. Educational intervention include four educational sessions of 45 to 60 minutes once a week based on booklet " be the best friend of your teeth" Which has been prepared by reviewing of the literature and the results of pre-test questionnaire analysis and are perform by lecture, question and answer, group discussion, role playing, video playback, training booklet and poster in intervention group. Primary research outcomes are oral health literacy, behavior and teeth plaque index, and secondary outcome are Protection Motivation Theory components (perceived vulnerability, perceived severity, self-efficacy, response efficacy and response costs) and knowledge.

Health conditions studied

1

Description of health condition studied
Oral Health Literacy

ICD-10 code
XXI

ICD-10 code description
Factors influencing health status and contact with health services

Primary outcomes

1

Description
Oral Health Literacy

Timepoint
Before the intervention and one month after educational intervention

Method of measurement
Oral Health Literacy questionnaire

2

Description
Plaque Index

Timepoint
Before the intervention and one month after intervention

Method of measurement
silness loe plaque index

3

Description
Oral health behavior

Timepoint
Before the intervention and one month after educational intervention

Method of measurement
Self-Made Protection Motivation Theory questionnaire

Secondary outcomes

1

Description
Perceived vulnerability

Timepoint
Before the intervention and one month after intervention

Method of measurement
Self-Made Protection Motivation Theory questionnaire

2

Description
perceived severity

Timepoint
Before the intervention and one month after intervention

Method of measurement

Self-Made Protection Motivation Theory questionnaire

3

Description

Self-efficacy

Timepoint

Before the intervention and one month after intervention

Method of measurement

Self-Made Protection Motivation Theory questionnaire

4

Description

Response Efficacy

Timepoint

Before the intervention and one month after intervention

Method of measurement

Self-Made Protection Motivation Theory questionnaire

5

Description

response costs

Timepoint

Before the intervention and one month after intervention

Method of measurement

Self-Made Protection Motivation Theory questionnaire

6

Description

Knowledge

Timepoint

Before the intervention and one month after intervention

Method of measurement

Self-Made Protection Motivation Theory questionnaire

Intervention groups

1

Description

Intervention group: educational intervention included 4 educational sessions of 45 to 60 minutes once a week based on booklet " Be the best friend of your teeth" and are performed by lecture, question and answer, group discussion, role playing, video playback, training booklet and poster.

Category

Behavior

2

Description

Control group: In the control group, educational intervention does not take place. These group will participate in the pre-test and post-test.
