The impact of couples educational program based basnef model on spouse support and mental health of pregnant women

Protocol summary

Summary

The main aim of this research is studying the effectiveness of couples training program based on Basnef model on spouses support and pregnant women's mental health. Specific goals include: comparing women's mental health before and after training in intervention and control groups, and comparing the elements of Basnef model such as knowledge, attitude, abstract norm, the factors needed in enabling couples from spouses support and pregnant women's mental health in intervention and control groups. before and after training. Design: this study is a semi-experimental study. method: the aim of study is presented to couples by researchers and after cooperation request, inviting spouses, and receiving paper of consent, participants enter to the study. the environment of research is health care centers of Hormozgan university of medical science in Bandar Abbas city. the centers selected by cluster random sampling in such away that health care centers of Bandar Abbas city are listed and for centers are selected by random sampling among which two centers are chosen to perform couple training plan, and two other are set as control centers. then 63 couples of these two centers are selected to receive training. the couple selection is done in a constant and accessible way. Receiving criteria include: all pregnant women and their spouses referring to the health care centers of Bandar Abbas; gestational age range is 20-30 weeks; fetus is confirmed by sonography; absence of intimate death during the past one year; delivery criteria include: taking anti-depressant medications; fetus death; renunciation or dropping out of study; the interventions based on basnef model include: 60 minutes face training for 4 sessions in the health care centers, together with distributing educational hand book and sending a reminder message to spouses once a week. Major outcome variable: studying the effectiveness of couple training program based on basnef model on spouses support and on eventually on pregnant women's

mental health.
