Effect of Intracranial Pressure Monitoring on Clinical Outcome and Mortality in Patients With Severe Traumatic Brain Injury

Protocol summary

Study aim

Effect of Intracranial Pressure Monitoring on Clinical Outcome and Mortality in Patients With Severe Traumatic Brain Injury

Design

The study will be double blind and clinical trial. 120 patients will be randomly divided into 2 groups. The groups are parallel. The trial phase is 3.

Settings and conduct

Patients With Severe Traumatic Brain Injury in Valiasr Hospital in Arak are divided into 2 groups by simple randomization with blocks. The study is double-blind in which outcome evaluator and data analyst and participant are kept blind.

Participants/inclusion and exclusion criteria

Inclusion criteria: Patients with head trauma, systolic pressure above 90 mm Hg, 18 years and above
Exclusion criteria: Death in the first 48 hours, mydriatic pupils are bilateral, Dissatisfaction

Intervention groups

Intervention group: The ICP monitoring device will be used for the participants in the intervention group. Patients will undergo intracranial pressure monitoring surgery within 6 hours of admission. Control group: routine treatment measures are performed based on the guideline "Dealing with severe head trauma patients 2007".

Main outcome variables

Glasgow Outcome Scale, mortality

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:
Patients with head trauma Systolic pressure above 90 mm Hg 18 years and above

Exclusion criteria:
Death in the first 48 hours Mydriatic pupils are bilateral Dissatisfaction

Age
From **18 years** old

Gender
Both

Phase
2-3

Groups that have been masked
No information

Sample size
Target sample size: **120**

Randomization (investigator's opinion)
Randomized

Randomization description
Patients will be allocated into 2 groups using a permuted balanced block randomization method with the size of blocks 4 and 8. Random sequence will be generated by an epidemiologist by running an online program in sealed envelope website (<https://www.sealedenvelope.com/>). Random chain concealment is done by opaque envelope method.

Blinding (investigator's opinion)
Not blinded
