

Clinical Trial Protocol

Iranian Registry of Clinical Trials

03 Aug 2026

The effect of self-care education on the quality of life of old women with type2 diabetes

Protocol summary

Study aim

Determining the effect of self-care training on the quality of life of elderly women with type 2 diabetes covered by health care centers of Shahid Beheshti University of Medical Sciences.

Design

Two stages before and after in two intervention and control groups, sampling by cluster method, sample size: 52 people in each group (total: 104 people), selection of 3 clusters and random selection from each center, 2 comprehensive health service centers

Settings and conduct

Explaining the objectives and duration of the study to the participants Self-care training in 7 sessions for 30 to 60 minutes for 2 months Educational materials include: general self-care, exercise and nutrition, mental health, foot care Location: comprehensive health service centers

Participants/Inclusion and exclusion criteria

Entry requirements: female gender, suffering from type 2 diabetes, having basic literacy, having a health record in the Sib system Exit conditions: immigration, death, hospitalization

Intervention groups

Providing diabetes self-care education to the intervention group Failure to provide diabetes self-care education to the control group

Main outcome variables

Quality of life of elderly women with type 2 diabetes

Title and more details about the data/document

The data that can be published from this study include the following: patient age, education, employment status, life status, level of quality of life before and after the intervention, level of anxiety and depression before

and after the intervention, level of changes in self-care scores before and after From the intervention, the amount of changes in life satisfaction scores before and after the intervention, the amount of changes in life status scores before and after the intervention

When the data will become available and for how long

The access period will start 6 months after the project results are published in the form of an article.

To whom data/document is available

The data obtained from this study will be available to researchers who intend to design a similar study.

Under which criteria data/document could be used

It is possible to use the data to evaluate the

effectiveness of self-care training and conduct analyzes that compare the average of the variables.

From where data/document is obtainable

Researchers can contact the person in charge of data collection through the following email to get the data:nekoe1376@sbmu.ac.ir

What processes are involved for a request to access data/document

The applicant must first submit the proposal and the code of ethics of the project that he intends to implement to the person in charge of collecting the project, and after the review by the project executive team, the information will be provided to him within a period of one month.
