Bioequivalence Study of desloratadine 5 mg manufactured by Pharma Chemi and Clarinex manufactured by Schering in 24 Healthy Volunteers under fasting condition

Protocol summary

Study aim

Bioequivalence of desloratadine tablets of Pharmachemi company with Clarinex tablets of Schering company (Germany)

Design

Cross over bioequivalence study

Settings and conduct

Sampling of volunteers is done in Khorazmi Plasma Center in Islamshahr. On the day of sampling, two 5 mg tablets of manufactured by Pharmachemi or Schering on two occasions and with a washout period of 7 days, will be administered orally with 240 ml of water to the volunteer. For example, if in the first phase he received the medicine made by Pharmachemi company, he will receive the brand medicine one week later. In each phase, 5 cc of blood sample will be taken before drug administration and at times 0.5, 1, 1.5, 2, 2.5, 3, 3.5, 4, 4.5, 5, 6, 8, 10, 24, 48, 72 hours after prescribing the medicine. One week after the start of the study, the volunteer's cooperation in this research ends. The way to cooperate in these three weeks is that the drug is prescribed in the first day and after that 72 hours blood sampling is done at the mentioned times after washout period of one week the other drug is administered and blood samples will be taken at the same time

Participants/Inclusion and exclusion criteria

inclusion criteria: A healthy male or female volunteer between the ages of 18 and 55 with a body mass index (BMI) between 19 and 30 - People who are willing to sign an informed consent form. Exclusion criteria:

Intervention groups

12 people who take Pharmachemi tablets The second group: 12 people who take Schering pills on the same day

Main outcome variables

Plasma concentration and area under the curve of plasma concentration time of test and reference drug

Scientific title

Bioequivalence Study of desloratadine 5 mg manufactured by Pharma Chemi and Clarinex manufactured by Schering in 24 Healthy Volunteers under fasting condition

Public title

Bioequivalence Study of desloratadine 5 mg manufactured by Pharma Chemi and Clarinex manufactured by Schering

Purpose

Other

Inclusion/Exclusion criteria

Inclusion criteria:

Healthy male or female volunteers between the age of 18 and 55 with a body mass index (BMI) between 19 and 30 volunteers who are willing to sign an informed consent form

Exclusion criteria:

History of allergy to desloratadine or formulation components History or significant clinical evidence of any disease Taking any type of medicine in the 14 days before the start of the study Participation in any clinical study within 30 days prior to study initiation

Age

From **18 years** old to **55 years** old

Gender

Both

Phase

Bioequivalence

Groups that have been masked

- Participant
- Data analyser

Sample size

Target sample size: **24**

More than 1 sample in each individual

Number of samples in each individual: **16**

5 millilitr blood sample is taken from each volunteer

Randomization (investigator's opinion)

Randomized

Randomization description

Using the rand option of the Excel software, the candidates are divided into two groups, and half of them will receive numbers 1-12 and the test drug, and the other half will receive numbers 13-24 and will receive the reference drug.

Blinding (investigator's opinion)

Double blinded

Blinding description

The tablets of Pharmachemi and Schering are both circular and white , so the candidate does not know which company's drug he will receive in each phase of the study. Additionally, the tubes of the volunteers' samples are also coded, so the analyzer does not know which company's drug he is analyzing, so only the researcher and the prescriber know which company's drug is being prescribed.

Health conditions studied

1

Description of health condition studied

A crossover bioequivalence study in 24 healthy volunteers

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description

Plasma concentration time profile, maximum plasma concentration, AUC

Timepoint

0, 0,5, 1, 1.5, 2, 2.5, 3, 3.5, 4, 5, 6, 8, 10, 24, 48, 72 hours after drug administration

Method of measurement

Liquid chromatography with mass spectrophotometry

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: 1: Oral administration of two tablets of desloratadine 5 mg manufactured by Pharmachemi/ Schering Company to 12 healthy volunteers under

fasting condition with 240 ml of water. Then 16 blood samples are taken from each volunteers at certain time.
