

Clinical Trial Protocol

Iranian Registry of Clinical Trials

20 Jul 2026

Evaluation of the effect of early exposure to lung radiography in pulmonary rotation medical students on the rate of lung disease learning

Protocol summary

Study aim

Investigating the effect of early exposure to lung radiography in pulmonary medical interns on the learning rate of lung diseases

Design

A non-randomized clinical trial with control and intervention groups, with parallel groups, without blinding; on 60 students

Settings and conduct

A one-day radiographic workshop in the radiology Department of Akbar Mashhad Hospital, for interns who entered the pediatric lung rotation.

Participants/Inclusion and exclusion criteria

They are intern students of the general medicine who are entering the children's respiratory diseases course.

Intervention groups

There are students who pass a one-day workshop on lung radiology before entering the lung course. And then they enter the common educational routine : And the control group are students who pass their course according to the common routine

Main outcome variables

The change in pre-test and post-test scores is the main outcome of the present study.

Scientific title

Evaluation of the effect of early exposure to lung radiography in pulmonary rotation medical students on the rate of lung disease learning

Public title

Evaluation of the effect of early exposure to lung radiography in pulmonary rotation medical students on the rate of lung disease learning

Purpose

Education/Guidance

Inclusion/Exclusion criteria

Inclusion criteria:

Intern students of the general medicine course who are entering the course of pediatric diseases.

Exclusion criteria:

Participation in other lung radiography interpretation workshops
Dissatisfaction in the detective agency

Age

From **18 years** old

Gender

Both

Phase

N/A

Health conditions studied

1

Description of health condition studied

The subject of study is not a disease.

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description

The change in pre-test and post-test scores is the main result of the present study

Timepoint

1 week

Method of measurement

pre-test and post-test exam

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: The intervention group is students who pass a one-day workshop on lung radiology before entering the lung rotation.

Category

Other

2

Description

Control group: The control group is the general medical students who do not attend the research workshop before entering the lung rotation. And according to the common medicine routine, which is a preliminary acquaintance with the section and word by section, they enter their lung routine.group:
