

Clinical Trial Protocol

Iranian Registry of Clinical Trials

18 Sep 2026

Evaluating the safety and efficiency of the combined use of mask and hair spray with the iDR brand, a product of Vera Rahesh Pharmed Company in repairing and improving the appearance of damaged hair compared to placebo.

Protocol summary

Study aim

Evaluating the safety and efficiency of the combined use of mask and hair spray with the iDR brand in repairing and improving the appearance of damaged hair compared to placebo.

Design

The study is a phase 2-3 clinical trial, cross over, randomized and double-blind comparison with placebo. Randomization is done simply using block randomization.

Settings and conduct

The study will be performed in Center for the Study and Research of Diseases of the Skin and Leprosy, 14 volunteers will be selected and enrolled in the study after signing consent form. Volunteers are taught to use of iDR brand hair spray and mask after bathing for two weeks or a placebo. Blinding the participants will be such that both products will be packed in the same containers, that are distinguished from each other only by code number on the packaging. In order to blind the outcome assessor, the randomization list will be provided to a third person and the allocation of formulations to each of the participants will be done after receiving the random code. Before intervention, 30 minutes after using and 2 weeks after not using changing in Hair shining will be measured.

Participants/Inclusion and exclusion criteria

Inclusion criteria: female aged 18-55 years, Good general health, Voluntary participation and sign the written informed consent. Exclusion criteria: Pregnancy and breastfeeding.

Intervention groups

Intervention group: Using iDR brand hair spray and mask after bathing for two weeks, at least 4 times. Depending on length and volume of the hair, one to three milliliters of the product should be used on the hair. After 5 minutes, use two puffs of iDR hair mask on the hair and

avoid washing it. Control group: Using spray with the same packaging as the original product containing normal saline and mask without active ingredients after bathing for two weeks, at least 4 times

Main outcome variables

Hair shine

Scientific title
 Evaluating the safety and efficiency of the combined use of mask and hair spray with the iDR brand, a product of Vera Rahesh Pharmed Company in repairing and improving the appearance of damaged hair compared to placebo.

Public title
 Evaluating the safety and efficiency of the combined use of mask and hair spray with the iDR brand in repairing and improving the appearance of damaged hair

Purpose
 Treatment

Inclusion/Exclusion criteria
Inclusion criteria:
 female aged 18-55 years. Good general health People with damaged hair naturally or after using hair color, including tangles, frizz, frizz, dullness. Voluntary participation and sign the written informed consent.
Exclusion criteria:
 People with known allergies to mask or spray ingredients Active acute or chronic scalp disease such as psoriasis, lichen planus, etc. Having any type of malignancy Scalp surgeries Pregnancy and breastfeeding Change in shampoo used or supplements taken such as zinc and vitamin C during the study. Using 2 in 1 shampoo containing softener, hair ointment, hair gel or tuft during the study

Age
 From **18 years** old to **55 years** old

Gender
 Female

Phase
 2-3

Groups that have been masked

- Participant
- Outcome assessor

Sample size
 Target sample size: **14**

Randomization (investigator's opinion)
 Randomized

Randomization description
 14 people are assigned to one of AB, BA sequences using block randomization.

Blinding (investigator's opinion)
 Double blinded

Blinding description
 The physician and expert evaluating the results and the participants are unaware of the type of products offered in each cycle. Blinding the participants will be such that both products will be packed in the same containers, that

are distinguished from each other only by code number on the packaging. In order to blind the outcome assessor, the randomization list will be provided to a third person and the allocation of formulations to each of the participants will be done after receiving the random code.

Health conditions studied

1

Description of health condition studied

hair damage

ICD-10 code

L67

ICD-10 code description

Hair color and hair shaft abnormalities

Primary outcomes

1

Description

Hair shine

Timepoint

Before intervention, 30 minutes and two weeks after use

Method of measurement

By Glossymeter probe from the device Multi Probe Adapter (MPA)

Secondary outcomes

1

Description

Number of people in improved or better condition

Timepoint

Before intervention, 30 minutes and two weeks after use

Method of measurement

Based on GAIS criteria: 0 = worse than baseline pretreatment appearance, 1 = no change, 2 = improved, 3 = much improved, 4 = excellent improvement

2

Description

The level of satisfaction of consumers in general and also separately for each of the parameters of hair softness, hair manageability, easy to comb and maintaining shine.

Timepoint

Before intervention, 30 minutes and two weeks after use

Method of measurement

based on not at all satisfied (-2), not satisfied (-1), not having a particular opinion (0), almost satisfied (1), very satisfied (2)

Intervention groups

1

Description

Intervention group: Using iDR brand hair spray and mask after bathing for two weeks, at least 4 times. Depending on length and volume of the hair, one to three milliliters of the product should be used on the hair. After 5 minutes, use two puffs of iDR hair mask on the hair and avoid washing it.

Category

Treatment - Drugs

2

Description

Control group: Using spray with the same packaging as the original product containing normal saline after bathing for two weeks, at least 4 times. Depending on length and volume of the hair, one to three milliliters of hair mask with mask base composition, without active ingredients on the hair and avoid washing it.

Category

Treatment - Drugs
