Bioequivalence study of Linagliptin 5mg tablet manufactured by Kharazmi Co versus originator brand (Trajenta) manufactured by Boehringer in fasting condition in healthy volunteers

Protocol summary

Study aim

Bioequivalence study of Linagliptin 5mg tablet manufactured by Kharazmi Co. versus originator brand (Trajenta) manufactured by Boehringer in fasting condition in healthy volunteers.

Design

Bioequivalence study, crossover, single-blinded, 24 healthy volunteers. Simple randomization was used for randomization

Settings and conduct

The study is a single-blinded (Volunteers), cross-over and fasting, and on two series of healthy volunteers. The study will be done in two periods (72h). The interval between these two periods is a week. In the first round of the study, the candidates were divided into two groups the first group received a test tablet and the second group received a brand tablet. Blood samples are collected immediately before and after drug administration by volunteers. Then, drug extraction is done and samples are ready for analysis. Sampling is performed in Radin laboratory in Tabriz.

Participants/Inclusion and exclusion criteria

Inclusion Criteria: General Health (Liver, Heart, and Kidney), Body Mass Index (18-28), Informed consent, Age (18-55 years old) Exclusion criteria: Smoking, History of cardiovascular disease, History of liver and kidney disease, Alcohol and drug addiction, History of allergy to Linagliptin

Intervention groups

Intervention group 1: Trajenta 5mg tablet manufactured by Boehringer as a reference Intervention group 2: Linagliptin 5mg manufactured by Kharazmi Co. as a test

Main outcome variables

Maximum drug concentration, Time to reach maximum drug concentration

Scientific title

Bioequivalence study of Linagliptin 5mg tablet manufactured by Kharazmi Co versus originator brand (Trajenta) manufactured by Boehringer in fasting condition in healthy volunteers

Public title

Bioequivalence study of Linagliptin 5mg tablet

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

General Health (Liver, Heart, and Kidney) Body Mass Index (18-28) Informed consent Age (18-55 years old)

Exclusion criteria:

Smoking History of cardiovascular disease History of liver and kidney disease Alcoholism and Narcoticism History of allergy to Linagliptin

Age

From **15 years** old to **55 years** old

Gender

Both

Phase

Bioequivalence

Groups that have been masked

- Participant

Sample size

Target sample size: **24**

Randomization (investigator's opinion)

Randomized

Randomization description

People in the mentioned age group are invited to participate through the advertisement. People are then checked for health and healthy volunteers are identified. Each candidate is assigned a number from 1 to 24. The numbers are written on a plastic ball and poured into a container and mixed. The balls are then removed randomly from the container. The first 12 no.s are considered as (first sequence: Kharazmi's medicine) and the second 12 no.s are considered as (second sequence: originator brand recipient). The volunteers don't have any information about taking the test drug or brand drug

Blinding (investigator's opinion)

Single blinded

Blinding description

This study is a single-blinded clinical trial (volunteers). Test and Originator brand's tablets are removed from their packaging by the executor and placed in similar and coded cans. Volunteers will not be informed about receiving the brand or test dosage form.

Health conditions studied

1

Description of health condition studied

This study is performed on healthy volunteers and drug concentration in plasma is determined.

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description

Drug plasma concentration

Timepoint

0, 0.5, 0.75, 1, 1.5, 2, 2.5, 3, 4, 5, 6, 8, 10, 12, 48 and 72 h after drug administration

Method of measurement

Liquid Chromatography Mass-Mass

Secondary outcomes

1

Description

Time to reach maximum plasma concentration

Timepoint

After intervention

Method of measurement

Time to reach the maximum drug concentration in plasma is recorded.

2

Description

Extent of absorption

Timepoint

After intervention
Method of measurement
Calculation of area under curve of concentration -time

Intervention groups

1

Description

Intervention group: Intervention group: single dose, one oral tablet Trajenta 5 mg manufactured by Boehringer as a reference product. after washout period, the volunteers receive Linagliptin 5 mg tablet manufactured by Kharazmi Co.

Category

Treatment - Drugs

2

Description

Intervention group: Single dose, one oral Linagliptin 5 mg tablet manufactured by Kharazmi company as test product. after washout period, the volunteers receive Trajenta 5 mg manufactured by Boehringer.

Category

Treatment - Drugs
