

Clinical Trial Protocol

Iranian Registry of Clinical Trials

16 Sep 2026

Investigating the effect of interdisciplinary training on self-efficacy and life satisfaction in hemodialysis patients

Protocol summary

Study aim

Determining the effect of interdisciplinary training on self-efficacy and life satisfaction in hemodialysis patients

Design

The current study is a simple randomized clinical trial without blinding that will be conducted on 60 patients undergoing hemodialysis. 60 cards are placed in a sealed envelope.

Settings and conduct

The current study is a randomized clinical trial study without blinding, which will be conducted on 60 hemodialysis patients referred to Vali Asr Fasa Hospital in the south of Fars province.

Participants/Inclusion and exclusion criteria

Participants will be hemodialysis patients. The criteria for inclusion in the study include: willingness to participate in the study, being literate in reading and writing, and having at least 6 months of hemodialysis experience. Exclusion criteria include absence of more than two sessions in training sessions, exacerbation and worsening of the disease condition, and unwillingness to continue participating in the study for any reason.

Intervention groups

The intervention group (30 people) will receive interdisciplinary training. The control group will not receive the training intervention and will only receive the training package.

Main outcome variables

Self-efficacy and life satisfaction

Sample size
Target sample size: **60**

Randomization (investigator's opinion)
Randomized

Randomization description
60 cards are placed in a sealed envelope. 30 cards are put on stickers (A intervention group) and labels are placed on other 30 cards (B control group). Then the patients participating in the study are asked to take one of the cards. People who take card A will be in the intervention group and people who take card B will be in the control group.

Blinding (investigator's opinion)
Not blinded

Intervention groups

1

Description

Intervention group: Intervention group: The interdisciplinary training program will be designed and implemented in the form of 5 sessions for the intervention group. The duration of each session will be 2 hours. In the first session, chronic kidney failure disease, its cause, aggravating factors of this disease will be taught, in the second session, the complications of chronic kidney failure disease, its effects on life, aggravating factors and factors that improve and reduce complications will be taught. . In the third session, recommendations related to nutrition, fluids, drugs and sexual education will be given to patients. In the fourth session, trainings related to assistance (guidance and introduction of clients to receive medical facilities to affiliated medical centers and help to solve the economic problem of sick clients in paying medical expenses, as well as, if necessary, communication with charities, relief committees or welfare organizations) and Also, spiritual issues (the purpose of one's life, belief in the other world and trust and faith in God) will be taught to the patients,

and in the fifth session, psychological issues (mental-psychological problems that these patients face and psychological support- Patients' social skills) will be taught to patients.

Title and more details about the data/document

All the questionnaires used in this study as well as the content of the training program will be provided to the applicants.

When the data will become available and for how long

The time period for accessing the data is after the publication of the article extracted from the study and there is no time limit.

To whom data/document is available

Researchers, nursing managers and hospital management can send their request to use the results of this research to the responsible author Mostafa Bijani in writing. Tell: 09173308451
Email: bizhani_mostafa@yahoo.com

Under which criteria data/document could be used

Nursing managers in the psychiatric department can use the results of this research to develop training programs for patients and patients' families.

From where data/document is obtainable

Researchers can send their request to use the results of this research to the responsible author Mostafa Bijani in writing. Tell: 09173308451
Email: bizhani_mostafa@yahoo.com

What processes are involved for a request to access data/document

Sending the request for the use of research documents and results to the responsible author and sending the results by the responsible author to the requesting person Tell: 09173308451
Email: bizhani_mostafa@yahoo.com
