Comparative bioequivalence study of Ticagrelor 90 mg F.C. Tablet of Zist Arvand Pharmed. and Brilinta® of Asterazeneca Sciences as reference in 24 healthy male under fasting condition

Protocol summary

Study aim

This study will be performed to compare the pharmacokinetics and invivo parameters of Ticagrelor 90 mg F.C. Tablet formulation as a test product with Brilinta 90 mg F.C. Tablet formulation as a reference product and to evaluate the bioequivalence of these two formulations.

Design

Non-blinded, randomized, crossover in vivo bioequivalence study on 24 healthy males under fasting conditions. Block randomization for a treatment sequence of Test/Reference or Reference/Test is used.

Settings and conduct

In each period, volunteers will receive a single dose of the treatment in the Noor Research and Development Institute (Tarasht, Tehran). 2 dosing periods will be separated by a 7-day washout period.

Participants/Inclusion and exclusion criteria

Inclusion Criteria: Healthy subjects (male) between 18 - 45 years of age. Body Mass Index (BMI) within 15% of normal range according to the accepted normal values between 18 and 27 (inclusive), calculated as kg/m².
Exclusion Criteria: Subjects with known allergy to the products tested. volunteers with associated acute or chronic infections.

Intervention groups

Intervention group 1: Ticagrelor 90 mg F.C. Tablet, produced by Zist arvand Pharmed. is the test product. In each period, 12 of 24 subjects will be given a single oral dose of this product. Intervention group 2: Ticagrelor 90 mg F.C. Tablet (Brilinta®), produced by Asterazeneca is the reference product. In each period, 12 of 24 subjects will be given a single oral dose of this product.

Randomization (investigator's opinion)

Randomized

Randomization description

The randomization schedule will be generated with <https://www.sealedenvelope.com/simple-randomiser/v1/lists>. A 2*2 block randomization list is created. We have 12 blocks and within each two volunteer numbers (allocated after screening) for all 24 volunteers. According to this list, a treatment sequence of Test/Reference or Reference/Test will be given to each volunteer.
