15 Jul 2026

Comparative study between interrupted suture and continuous suture in Snodgrass surgery techniques for hypospadias repair

Protocol summary

Summary

This study is a randomized clinical trial with 80 patients between 1 to 12 years old with ant or mid hypospadias without chordea. They will be operated by two methods of interrupted and continues suturing. All of the surgery will be done by one expert surgeon and assistant. These patients will be visited one week and three months after stent removal for comparison of success and side effects of these two methods.

Scientific title

Comparative study between interrupted suture and continuous suture in Snodgrass surgery techniques for hypospadias repair

Public title

Comparing two methods of suturing in repairing hypospadias using Snodgrass technique

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria: affliction of anterior or middle hypospadias; age between 1 to 12 years. Exclusion criteria: history of circumcision; history of any treatment in past; history of chordea of penis.

Age

From **1 year** old to **12 years** old

Gender

Male

Phase

N/A

Groups that have been masked

No information

Sample size

Target sample size: **80**

Q54

ICD-10 code description

Hypospadias

Primary outcomes

1

Description

Fistule

Timepoint

One week and three months after intervention

Method of measurement

Visual

2

Description

Urethral stricture

Timepoint

One week and three months after intervention

Method of measurement

Unpossibility of insertion of 6 or 8 fr stent through newly
made urethra

3

Description

Break down of the repair

Timepoint

One week and three months after intervention

Method of measurement

Visual

Secondary outcomes

1

Description

Time of the operation

Timepoint

From the first incision until dressing the wound

Method of measurement

Minute

Intervention groups

1

Description

tubularization in Snodgrass technique by continues
sutures

Category

Treatment - Surgery

2

Description

tubularization in Snodgrass technique by separate
sutures
