Bioequivalence study of Gliclazide 80 mg Tablet (Tehran Chemie) versus Diamicron (SERVIER) Tablet after single oral dosing in healthy volunteers

Protocol summary

Study aim

Bioequivalence study of Gliclazide 80 mg Tablet (Tehran Chemie) versus Diamicron (SERVIER) Tablet after single oral dosing in healthy volunteers

Design

Bioequivalence study, with control group, double-blind, randomized, on 24 volunteers, from each volunteer 20 blood samples were taken. Sealed envelope is used for randomization.

Settings and conduct

The subject of this biopharmaceutical and pharmacokinetic study is the location of Blood collection center of Tam Pouya Company located in Tehran. The study was blinded to the study participants by removing the drugs from the original package and placing the test and reference drugs in the same package, and the participants were not aware of the type of drug they were taking. The crossover design is such that the Iranian drug will be prescribed to the first group in the first week and to the second group in the second week. Brand medicine, on the contrary, Iranian medicine will be prescribed.

Participants/Inclusion and exclusion criteria

Inclusion criteria: general health (liver, heart and kidneys), body mass index (18-28), informed consent, age (50-18) Exclusion criteria: smoking, history of cardiovascular disease, history of liver disease and Renal, alcohol and drug addiction, history of allergy to Gliclazide

Intervention groups

Intervention group: Receives one tablet of test drug (Gliclazide 80 mg tablet pharmaceutical company Tehran Chemie). Control group: Receives one reference medicine tablet (Diamicron 80 mg tablet SERVIER pharmaceuticals).

Main outcome variables

Drug concentration in plasma samples

Scientific title

Bioequivalence study of Gliclazide 80 mg Tablet (Tehran Chemie) versus Diamicron (SERVIER) Tablet after single oral dosing in healthy volunteers

Public title
Bioequivalence study of Gliclazide 80 mg mg
Purpose
Other
Inclusion/Exclusion criteria
Inclusion criteria:
18 to 55 years old. Weight in range of 10 % proper body weight. All volunteers should be in a good health condition on the basis of medical history, physical examination, routine blood test. Possessing negative test for hepatitis B surface antigen (HBs-Ag), Antihepatitis-C antibody (anti-HCV) and anti-HIV. just the man
Exclusion criteria:
Volunteers with hypersensitivity to Gliclazide were excluded. Those with known history of drug abuse. alcohol consumer or cigarette smokers. Taking medications that have drug interactions with Gliclazide until one month before studying. Disinclination to take the test. Blood donation or blood loss of more than 200 ml in the past month.
Age
From **18 years** old to **55 years** old
Gender
Male

Phase
Bioequivalence
Groups that have been masked

- Participant
- Care provider

Sample size
Target sample size: **24**
Randomization (investigator's opinion)
Randomized
Randomization description
In order to randomly allocate people in two groups, 24 cards with numbers 1 to 24 will be used in closed envelopes that are placed in random order. After entering the study, each candidate will take an envelope, numbers 1-12 will be in group A and numbers 13-24 will be in group B. Group A will receive intervention 1 (test product) and group B will receive intervention 2 (reference product) and after the first period, the interventions of the two groups will be moved for the second period
Blinding (investigator's opinion)
Double blinded
Blinding description
This study is a Double-blind (participant) clinical trial. Gliclazide and Diamicron tablets are removed from the package by the administrator and placed in similar and coded cans. Medicine and placebo are the same in terms of the method of administration
Placebo
Not used
Assignment
Crossover

Health conditions studied

1

Description of health condition studied
Bioequivalence study of Gliclazide 80 mg Tablet (Tehran Chemie) versus Diamicron (SERVIER) Tablet after single oral dosing in healthy volunteers
ICD-10 code
ICD-10 code description

Primary outcomes

1

Description
Drug concentration in plasma samples
Timepoint
In times 0 ، 1، 2، 2/5 ، 3، 3/5، 4، 4/5 ، 5، 5/5 ، 6، 6/5، 7، 7/5، 8، 9، 10، 18، 24، 30، 36 ، 48 Hours after the start of the intervention
Method of measurement
Chromatography

Secondary outcomes

empty

Intervention groups

1

Description
Intervention group: Receives one tablet of test drug (Gliclazide 80 mg tablet pharmaceutical company Tehran

Chemie). Blood samples were taken from the volunteers for 48 hours at the mentioned times after drug administration and the drug concentration in plasma samples was measured by liquid chromatography with UV detector.
