Peace Education and Empowering Primary School Students In Peer Mediation along Social Health

Protocol summary

Summary

This study examined empowering 10-11-years-old primary school pupils in peer mediation. The participants were 122 forth- and fifth grade students from Mid-SES boys school. A quasi- experimental design was used. The experimental group consisted of 122 students and the control group consisted of 153 students. Those in experimental group received conflict resolution training twice a week for eight weeks and peer mediation program implemented and observed for three months. Five months after starting intervention, interpersonal conflicts between students have been investigated during a month.
