Evaluation of low level laser therapy for patients with chronic cervical pain (non specific)

Protocol summary

Summary

With the aim of the effect of low-level laser therapy on patients with chronic cervical pain, patients referred to the specialized clinic of the hospital with a complaint of chronic neck pain over a period of more than three months who have no red flags (non-specific) are selected if they have tenderness on the spine and Also, they are included in the study if they do not have psychiatric symptoms, including sleep deprivation, and yellow fever, in the age range of 20 to 60 years. All patients are divided into two groups of case and control according to a random number table of 1: 1 ratio. The group assigned to the subject is buried buried in dark envelopes. This envelope will be opened by a doctor only after the initial assessment of each person, and neither patients nor clinical evaluators will be informed of their treatment group. Patients are randomly assigned into two groups of light and off laser, and other therapeutic protocols include exercises of the same patient as exercise and the same medicine. There are 22 patients in each group. In the laser group, using a 980nm low-power laser with a dose 16 Jules per square centimeter in the affected areas of the lining and the muscles of the vertebral column and upper trapezius are exposed 3 times a week for 12 sessions. The results will be evaluated on a weekly basis with a tenderness and painful bedside.

Scientific title

Evaluation of low level laser therapy for patients with chronic cervical pain (non specific)

Public title

low level laser therapy in cervical pain

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria: Chronic cervical pain over 3 months without red flags (non-specific); Tenderness on the spine;

no symptoms of psychiatry including emotional sleep disorders and yellow fever (yellow flags); ages 20 to 60 Year . Exclusion criteria: Cranial pain with red flags; Psychopathological symptoms including emotional sleep disorders and yellow flags; over 60 and under the age of 20 years.

Age

From **20 years** old to **60 years** old

Gender

Both

Phase

3

Groups that have been masked

No information

Sample size

Target sample size: **44**

Health conditions studied

1

Description of health condition studied

chronic cervical pain

ICD-10 code

G54.2

ICD-10 code description

Cervical root disorders, not elsewhere classified

Primary outcomes

1

Description

Tenderness and painful motion

Timepoint

Weekly at the beginning and end of treatment

Method of measurement

VAS and DASD questionnaire

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: 980 nm low-power laser with a dose of 16 Jules per square centimeter

Category

Treatment - Other

2

Description

Control group: shame laser, other therapeutic protocols include patient education, exercise and medicine are similar.

Category

Placebo
