Comparision of topical amitriptyline and topical capsaicn in pain reduction of painful diabetic neuropathy of type2 diabetic patients

Protocol summary

Summary

This study is double blind randomized clinical trial that is planned for the comparison of the effects of topical capsaicin and topical amitriptyline in pain reduction of patients with painful diabetic neuropathy. The study population consists of type two diabetic patients. Patients with painful diabetic neuropathy with visual analogue scale equal and grater than four will be included. Patients with hepatic or renal failure, use of other drugs for pain reduction and HA1C \geq 9 will be excluded. After signing the informed consent, the eligible patients (100 patients) will be assigned randomly into two different groups: Capsaicin and amitriptyline. Patients in capsaicin group will receive 0.75% capsaicine cream three times a day on the feet. Patients in amitriptyline group will receive 2% amitriptyline cream three times a day on the feet. The primary outcome is pain reduction and will be assed by visual analogue scale at the end of each month up to three month. At the end of the study mean pain reduction will be compared in two groups.

Scientific title

Comparision of topical amitriptyline and topical capsaicn in pain reduction of painful diabetic neuropathy of type2 diabetic patients

Public title

Comparision of amitriptyline and capsaicn in painful diabetic neuropathy

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria: Type two diabetic patients with Painfull diabetic neuropathy Exclusion criteria: Duration of diabetes less than one year; Age <30 or >70 years; VAS<4; Type one diabetes; Other causes of neuropathy other than diabetes; Opiom or alcohol users; Use of other

drugs for pain reduction; Hepatic or renal failure;
HA1C≥9; Pregnancy or lactation; Ulcer or infection of
foot; Hypersensitivity to pepper

Age

From **30 years** old to **70 years** old

Gender

Both

Phase

2-3

Groups that have been masked

No information

Sample size

Target sample size: **100**
