Empowering effect on the prevention of domestic violence against women in the city of Gorgan in Winter 1390

Protocol summary

Summary

This study is a single group clinical trial conducted to assess the empowering effect on the prevention of domestic violence against women supported by Imam Khomeini Relief Committee in Gorgan. Target populations are all married women with at least one child. 91 ones were selected using random sampling. Before starting the study, pretest will be held and knowledge, attitudes, self-efficacy and esteem score was determined, then educational content was developed and three training sessions were held. 40 days after the pretest, post test will be held.
